PROJECTS:

- VeriDelete Cloud: Privacy-Preserving Proof-Based Data Erasure System** | *React.js, JavaScript, HTML5, CSS3, Responsive Web Design*
 - Designed a frontend prototype for a privacy-preserving cloud data erasure system with file deletion request, verification status, and audit history screens.
 - Developed responsive user interface pages using React.js, JavaScript, HTML5, and CSS3 for secure file management workflows.
 - Built dashboard views for deletion history, proof verification status, compliance tracking, and user/admin navigation flows.
 - Designed interactive user interfaces to visualize proof-based deletion workflows, audit history, verification status tracking, and security-focused reporting dashboards.
- StressSense AI: Employee Well-Being Analytics Platform** | *Python, Flask, SQL, HTML, CSS, JavaScript*
 - Developed an employee well-being analytics platform to analyze workload, deadlines, and work-life balance factors for stress prediction.
 - Implemented machine learning models to classify employee stress levels and identify high-risk groups using structured input data.
 - Built Flask backend modules and SQL workflows for employee record management, stress analysis, and recommendation generation.
 - Designed responsive frontend screens and automated reporting workflows to display stress trends, prediction results, and wellness insights.
- ServiceOps Nexus: Enterprise ITSM, AIOps & RAG Knowledge Platform** | *Next.js, React.js, TypeScript, Java, Spring Boot, PostgreSQL, Docker*
 - Engineered an enterprise-style IT service management platform for incident tracking, service operations, admin governance, and knowledge-based assistance.
 - Developed ITSM workflows for users, roles, incidents, services, audits, integrations, search filters, CSV export, and operational reporting.
 - Implemented role-based access control, audit logs, and governance controls to support secure enterprise operations.
 - Designed AIOps-style dashboards with service health indicators, incident status, operational metrics, and RAG knowledge assistant concepts.
